

Who will build the Indonesian Upper West Soka pumped storage power station?

On July 7, 2022, China Energy China Gezhouba International Company and the Indonesian National Electric Power Company signed a contract for the construction of the Indonesian Upper West Soka Pumped Storage Power Station.

Where is the Soka pumped storage power station located?

Signing site The Upper Soka Pumped Storage Power Station is located in the upper reaches of the Soka River in Java Island, Indonesia, 190 km away from the capital Jakarta and about 65 km away from Bandung. The power station is equipped with four 260-megawatt generator sets with a total installed capacity of 1,040 megawatts.

When will the ESIA projects be completed?

Prefeasibility studies for both projects were completed in 2023, while feasibility studies for both projects are under way. The two ESIA studies which are subject of this prequalification will complete the ongoing feasibility studies. The ESIA studies will be co-funded by KfW in the framework of the Sustainable Hydropower Programme III.

In a statement, Greenko Group said the hydro storage project, located in the Khemla block of Neemuch, is capable of managing a storage capacity of 7.5 hours and being expanded to 1,920 MW, with six hours ...

On February 19, Yangtze Power announced that the 39th meeting of the sixth Board of Directors of the company reviewed and passed the proposal on the investment in the construction of Henan Gongyi Housihe Pumped storage Power Station Project, agreeing to invest in the construction of the project by Henan Gongyi Pumped Storage Co., LTD., with a total ...

The proposed pumped-storage hydropower project's capacity is 500 MW. Renewable energy developer Olympia Violago Water & Power, Inc. (OVPI) has signed an agreement with the Power Construction Corporation of ...

Tata Power has signed an MoU with the Asian Development Bank (ADB) to evaluate financing of USD 4.25 billion for Tata Power's various ongoing clean energy and power infrastructure projects in India including 966 MW solar-wind hybrid project, and pumped hydro storage projects.
