

How many MW of new battery storage capacity does Greece have?

The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program. The projects range in size from 8,875 MW/17,75 MWh to 49,9 MW/100 MWh).

How much does an energy storage auction cost in Greece?

The regulator said the auction was highly competitive, leading to an average tender price of EUR47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years. The submitted bids were capped at EUR115,000/MW per year, with the lowest successful bid set at EUR44,100/MW per year.

How often should energy storage projects be completed in Greece?

Investors will be expected to submit progress reports every three months to ensure timely construction. Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of EUR49,748/MW per year.

Does Greece have a 1 GW energy storage program?

The auction is part of Greece's 1 GW energy storage program. The country announced its 1 GW energy storage program in the summer with three separate tenders featuring 400 MW, 300 MW and 300 MW of capacity. The first tender awarded 12 energy storage projects in August, with 411,79 MW of capacity in total.

How does Athens Self Storage work?

Athens Self Storage is a locally owned facility that allows customers to access their storage units on a 24-hour basis and easily pay their bills online.

Does Greece need a third energy storage tender?

Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of EUR49,748/MW per year. To conclude its energy storage auction program, Greece needs to run a third storage tender to account for the remainder of the program's 1 GW of capacity.

Because energy storage can release power on demand, adding BESS in strategic locations makes the grid stronger and more resilient. Want to learn more about energy storage? Download our Energy Storage Factsheet!
