

What makes ATL energy a sustainable company?

At ATL Energy, we believe in making a positive, lasting impact on the world through clean, renewable energy. Our values guide everything we do, ensuring we stay committed to sustainability, innovation, and customer satisfaction. A sustainable future powered by clean, accessible renewable energy solutions.

What is ATL energy?

At ATL Energy, we are committed to building a sustainable future through innovative renewable energy solutions. Our mission is to make clean, reliable, and affordable energy accessible for commercial and industrial solarization across Pakistan. With a team of 100+ engineers, ATL Energy has successfully installed 11.528 MWp of solar PV systems.

How many MWp of solar PV systems has ATL energy installed?

With a team of 100+ engineers, ATL Energy has successfully installed 11.528 MWp of solar PV systems. Additionally, we are pioneers in providing Battery Energy Storage Systems (BESS) for a wide range of applications, having installed 25.42 MWh of storage systems to date. ATL Energy - Powering a Greener Tomorrow.

Why should you choose ATL energy?

ATL Energy is here to help you make the switch to renewable energy with our expert solar solutions. At ATL Energy, we are dedicated to creating a sustainable future through renewable energy solutions. Our mission is to make clean, alternative energy accessible for homes, businesses, and communities across Pakistan.

What is ATL's partnership with AM batteries & Group14 technologies?

In 2023, ATL partnered with AM Batteries and Group14 Technologies. The partnership with AM Batteries focuses on developing solvent-free electrode manufacturing technology, while the collaboration with Group14 Technologies aims to integrate advanced silicon battery technology to enhance ATL's battery performance.

What is Amperex Technology Limited (ATL)?

Amperex Technology Limited (ATL) manufactures lithium-ion batteries for consumer electronics, particularly smartphones and tablets. It excels in producing compact, lightweight batteries that deliver high performance. A significant portion of ATL's revenue comes from designing and customizing batteries to meet the specific needs of its clients.

Lawrence Berkeley National Laboratory has released the latest edition of its annual report, Residential Solar-Adopter Income and Demographic Trends. The report is based on address-level data for 3.4 million residential households across the country that installed solar onsite through year-end 2022, representing 86% of all U.S. residential PV systems.

The ATL Li-ion battery product family includes high energy density, high power, fast charge and

arbitrary-shaped cells and so on. To cope with or even lead the market demand, we have developed various types of li-ion battery cells to ...
