Are portable AC units energy efficient?

When your conventional AC system is not cutting, having a mobile AC unit in the same room you are in can help keep you cool and comfortable. However, the question we will be answering today is, are portable air conditioners truly energy efficient? In short, portable air conditioners are energy-efficient.

Does a portable air conditioner save energy?

Portable air conditioner energy efficiency depends on how you use it and what you compare it to. A portable air conditioner will save you money on your electricity bill yearly compared to your central heating and cooling system. However, this also greatly depends on how you use it.

How much can you save with an energy-efficient portable AC unit?

An energy-efficient portable AC unit can save you up to \$70 per year. In 10 years, that's \$700 less in electricity bills. The best portable air conditioners are the most energy-efficient ones, with high EER ratings.

Can a portable air conditioner cool a large room?

Typical Portable Air Conditioners Are Not Suited To Cool Large Rooms  
The most standard portable AC units have a BTU rating of 6,000 to 8,000, and they can only cool a space of 350 square feet reliably. While there are portable air conditioners with a much higher BTU rating, they are MUCH bigger and much more expensive.

Are portable air conditioners energy-efficient?

In short, portable air conditioners are energy-efficient. However, this greatly depends on how you are using it. Using a portable air conditioner as a suitable replacement for your conventional AC unit that cools down your whole house can save you quite a bit of money. This does depend on if you are using it only to cool the room you are in.

What is included with some portable AC units?

Some manufacturers include the window kit (otherwise, it costs about \$20). That's basically a way to seal the window through which you lay the portable air conditioner vent. Almost every portable AC unit has a built-in dehumidifier that's, in many cases, more powerful than a stand-alone dehumidifier.
