Solar power is a renewable energy source, which means using solar panels to charge your EV can significantly reduce your carbon footprint. Without home solar panels, your EV is powered from the grid -- which often relies on burning fossil fuels. To maximize the environmental benefits of your EV, use solar panels to charge your vehicle.

Do EV drivers need a storage battery?

Enact recommends a storage battery -- sometimes called a home battery -- for electric vehicle drivers. Not only does a storage battery store unused solar energy, but it can help keep the cost of charging your vehicle lower. Storage batteries help EV drivers mitigate the impact of NEM 3.0 or Time-of-Use (TOU) rates.

Are solar panels and electric cars a good idea?

With the rise of electric vehicles (EVs) and the growing interest in sustainable energy solutions, the intersection of solar panels and electric cars has become an important topic for homeowners. Harnessing clean energy to charge your vehicle can offer environmental benefits, cost savings and increased energy independence.
