

Will China's big fund invest \$39 billion in Xinqiao storage technology?

Following China's Big Fund's substantial \$14.56 billion RMB investment in Changxin Xinqiao Storage Technology, a memory chip manufacturer, at the end of October, there are now reports of an additional \$39 billion RMB injection.

Why did Changxin Xinqiao start a DRAM factory?

With support from the Hefei City government, Changxin Xinqiao initiated the DRAM factory construction project in 2019 and laid out a policy to make use of domestically manufactured semiconductor production equipment. (Image: CXMT)

What is Asia supply chain 250 dataset access?

Asia Supply Chain 250 dataset access. ChangXin Memory Technology (CXMT), the China-based memory manufacturer, announced the launch of several new LPDDR5 DRAM chips, claiming it is China's first memory brand to self-develop LPDDR5 DRAM, and it is also the first to adopt Package on Package (PoP) technology to assemble its chip.

How is Changxin Xinqiao accelerating the procurement process?

At present, Changxin Xinqiao has initiated the tendering process for new facility equipment and is poised to accelerate procurement and related procedures using the recently acquired funding.

The U.S. Commerce Department should put trade curbs on Chinese memory chip maker Changxin Memory Technologies (CXMT) after Beijing earlier this week banned the sale of some chips by U.S.-based ...

According to a report from Tom's Hardware citing industry sources, it's indicated that Chinese memory giant ChangXin Memory Technologies (CXMT) has started mass production of HBM2. If confirmed, this is approximately two years ahead of the expected timeline, although the yield rate for HBM2 is still uncertain.

Wins National Enterprise Technology Center award; 2016 Wins National Demonstration Enterprise for Technology Innovation award; 2018 CNAS Laboratory Certification; 2019 CATL& KSTAR Science and Technology Co., Ltd founded; 2020 KSTAR (Vietnam) in construction; 2021 Jiangxi Changxin Golden Sunshine Power Co., Ltd. Completed;

China is taking significant steps to increase its domestic supply of critical technology, particularly in the semiconductor industry. One of the key developments is the establishment of a new semiconductor company called Changxin Xinqiao Storage Technology (CXMT), which will operate a 150 billion yuan (\$5.3 billion) factory in Hefei, Anhui Province.

ChangXin Memory Technologies (CXMT), China's leading producer of dynamic random access memory ... the chip achieves a storage density of 0.239Gb per square millimetre, according to the report. ...

Chinese chipmaker ChangXin Memory Technologies (CXMT) plans to list on the Shanghai stock exchange. The manufacturer is the only company in China capable of making DRAM semiconductors below 20nm. - ...
