

Galaxy Securities pointed out that Ningde era is the global leader in lithium batteries, with a significant dominant position.

The Ultimate Battery As batteries have become the basis of EV powertrains, their performance and safety profile have improved. So far, this has been achieved with variations of lithium batteries, either lithium-ion (lithium-nickel-manganese NMC & lithium-nickel-cobalt-aluminum NCA) or lithium-ferrum-phosphate (LFP) batteries. It was a transformative ...

According to a research report released by Galaxy Securities, in 2024, domestic new energy consumption promotion and solar storage prices are strong, while the US mainly benefits from policy subsidies and interest rate cuts. On the one hand, under the dual drive of policy guidance and the improvement of high-quality supply, the domestic sales of new energy vehicles are expected to exceed expectations again, forming a strong support. On the other hand, the marginal improvement brought by the consumption electronics boom driven by AI will give consumer batteries a greater elastic space.
