Energy storage devices are one of the solutions to reduce capacity charges. According to the electricity consumption habits, the user charges the energy storage device when the electricity load is low, and discharges the energy storage device when the load is high. It can reduce its maximum load and achieve the purpose of reducing capacity costs.

Journal of Energy Storage . Globally, electric vehicles have been widely adopted during the last ten years. In 2020, Plug-in EVs sales surpassed 3.24 million vehicles compared to 2.26 million for the previous year with a year on year (Y-O-Y) growth of 43%, and 4.2% share of all new car sales [17]. Overall, Plug-in EV sales and market share can be observed by region in
