section given below) can be fitted. In addition, it allows the back-up nitrogen bottles to be shut off from the hydraulic accumulator. z Safety Equipment for Hydraulic Accumulators No. 3.552 4.1.2 Hydraulic circuit with charging and testing block nitrogen bottles hydraulic accumulator safety and shut-off block charging and testing block

Never use oxygen or compressed air to precharge an accumulator! As the oxygen is compressed it heats up and can cause a fire or explosion when mixed with the hydraulic oil. Different manufacturers and styles of accumulator require ...

When a fluid travels through the accumulator, and the pressure  $P_1$  of that fluid is higher than the pre-charge pressure  $P_0$  of the accumulator, then the gas compresses to  $P_1$ , the separator changes shape, and the accumulator can take in the corresponding volume of fluid. Any pressure drop in the hydraulic circuit causes the accumulator
