

# How to compile product codes for energy storage products

Does industry need energy storage standards?

As cited in the DOE OE ES Program Plan, "Industry requires specifications of standards for characterizing the performance of energy storage under grid conditions and for modeling behavior. Discussions with industry professionals indicate a significant need for standards ..." [1, p. 30].

What is energy storage R&D?

Under this strategic driver, a portion of DOE-funded energy storage research and development (R&D) is directed to actively work with industry to fill energy storage Codes & Standards (C&S) gaps. A key aspect of developing energy storage C&S is access to leading battery scientists and their R&D insights.

How can C&S help with energy storage?

The resulting report, published in 2019, is a "best practice guide" that includes guidance, pp. 293-311] on how energy storage C&S can help facilitate the use of risk and financial tools needed for the development of larger ESS projects. Another financial example comes from the experiences of solar photovoltaic (PV) installation.

Should energy storage safety test information be disseminated?

Another long-term benefit of disseminating safety test information could be baselining minimum safety metrics related to gas evolution and related risk limits for creation of a pass/fail criteria for energy storage safety testing and certification processes, including UL 9540A.

What is MESA-device & sunspec energy storage model?

MESA-Device specifies standardized communications between components within the ESS. MESA-Device Specifications/SunSpec Energy Storage Model addresses how energy storage components within an ESS communicate with each other and other operational components. MESA-Device specifications are built on the Modbus protocol.

What equipment is used in distributed energy resources?

Inverters, converters, controllers and interconnection system equipment for use with distributed energy resources. Underwriters Laboratories. January 2020. Correspondence to Charlie Vartanian. The authors declare no competing interests. The article does not contain any studies with human or animal subjects performed by any of the authors.

7. Set up a product code naming convention, and stick to it! Using the example outlined in point 6, if in the future our supplier starts stocking yellow t-shirts in the design "TEE01", we can easily add "TEE01-YL" as a new SKU ...
