

# How to make money with energy storage app

Can energy storage make money?

Energy storage can make money right now. Finding the opportunities requires digging into real-world data. Energy storage is a favorite technology of the future--for good reasons. What is energy storage? Energy storage absorbs and then releases power so it can be generated at one time and used at another.

Why do companies invest in energy-storage devices?

Historically, companies, grid operators, independent power providers, and utilities have invested in energy-storage devices to provide a specific benefit, either for themselves or for the grid. As storage costs fall, ownership will broaden and many new business models will emerge.

Can a battery energy storage system help balance the grid?

"A battery energy storage system (BESS) can be used to help balance the grid, by storing and discharging energy when it's needed, improving our energy resilience.

Can battery energy storage systems generate revenue through grid services?

Many of our customers are using battery energy storage systems to generate revenue through providing grid services. Many of our customers use battery energy storage systems to generate revenue through grid services. But how easy is it and what does it all mean? Frazer Wagg, Head of Data Services at Connected Energy, explains...

How does energy storage work?

Energy storage can be used to lower peak consumption (the highest amount of power a customer draws from the grid), thus reducing the amount customers pay for demand charges. Our model calculates that in North America, the break-even point for most customers paying a demand charge is about \$9 per kilowatt.

What are the benefits of energy storage?

There are four major benefits to energy storage. First, it can be used to smooth the flow of power, which can increase or decrease in unpredictable ways. Second, storage can be integrated into electricity systems so that if a main source of power fails, it provides a backup service, improving reliability.
