

How does saving paper save money?

Saving paper in your home, school or office can save you a ton of money too. This forces people to contact you through these electronic mediums. Saving paper in your home also conserves forests, energy, soil, water and air.

How to save paper?

1. Get a dry erase board. A dry erase board will save paper because it keeps you from randomly making notes on any sheet of paper that you see. It's also reusable for a long period of time and aids in organization and efficiency. 2. Make use of the virtual world.

Why should you save paper at home?

Saving paper in your home conserves forests, energy, soil, water, and air, and it can also save you a ton of money. This encourages people to use electronic mediums for communication. How else are you saving paper in your home?

What are the benefits of reducing paper usage?

By using less paper, you can reduce your impact on forests, cut energy use and climate change emissions, limit water, air and other pollution and produce less waste. To make a difference for the planet and the climate--and to save a lot of money too--reducing your "paper footprint" is the only way to go.

Does recycling paper save you money?

Saves you money in the long run. Paper costs tend to add up over time. If you doubt this claim, try accounting for your home or office paper product usage over the course of a month period. The process of recycling paper requires energy and usually bleaching agents. Both bleach and energy production generally harm the environment.

How can we reduce our paper footprint?

To make a positive impact on the planet and the climate, and to save money, reduce your "paper footprint" by using less paper. This helps to preserve forests, cut energy use and climate change emissions, limit pollution, and reduce waste.
