Are batteries more expensive than hydrogen?

Batteries' Levelized Cost Of Storage could be 10 times higher than hydrogen. The energy transition is pushing towards a considerable diffusion of local energy communities based on renewable energy systems and coupled with energy storage systems or energy vectors to provide independence from fossil fuels and limit carbon emissions.

Can a battery supply hydrogen?

At times of high energy costs, the battery can supply the hydrogen production or can discharge to the grid in high demand periods. A part of the produced hydrogen can be injected into the intake manifolds of the adjacent LNG-fired gas turbines acting as a Peaker plant.
