

Can a large-capacity hydrogen storage system meet the demand for energy storage?

For instance, if the portion of electricity with rapid fluctuations and the user's peak load are relatively small, a larger-capacity CB could serve as the base load for energy storage, while a smaller-capacity hydrogen storage system could meet the demand for rapid-response energy storage.

What is the difference between Carnot battery and hydrogen energy storage?

Carnot battery serves as the base load for stable, large-scale energy storage, while hydrogen energy storage (PEMEC and SOFC) serves as the regulated load to flexibly absorb excess renewable electricity and responds promptly to user demand.

What is CB & hydrogen storage?

The integrated system utilizes CB as a basic load for large-scale energy storage, while incorporating hydrogen storage as a flexible regulating load to rapidly respond to fluctuations in electricity supply and demand.

What is hydrogen energy storage?

Hydrogen energy storage utilizes electrolytic cells and fuel cells for the conversion between electricity and hydrogen energy. For hydrogen production, the proton exchange membrane electrolysis cell (PEMEC) is renowned for its high electrolysis efficiency (58 %-70 %) and economic advantages.

How to calculate RTE and exergy efficiency of hydrogen energy storage system?

The round-trip energy efficiency (RTE) and exergy efficiency of the hydrogen energy storage system are defined as follows:  $\eta_{ch} = \frac{W_{ex,h}}{W_f + W_{e,H2} + W_{c,H2}}$  where  $W_{e,H2}$  is the power generated by the H<sub>2</sub> expander of the SOFC subsystem, kW;  $W_{c,H2}$  is the power input of the H<sub>2</sub> compressor of the PEMEC subsystem, kW.

Can energy storage combine CB and hydrogen?

This study proposes an integrated energy storage system combining CB with hydrogen energy storage. During the energy storage process, CB acts as the base load to absorb large-scale surplus electricity, while PEMEC serves as the regulating load, flexibly absorbing fluctuating power.
