

Can solar PV be used on agricultural land in Italy?

Italy's Council of Ministers has approved a decree that introduces urgent provisions for the agriculture sector, including limiting the deployment of solar PV on agricultural land. The new rules are based on a proposal from President Giorgia Meloni, which includes several measures aimed at protecting the agriculture and fisheries sectors.

Will photovoltaic systems be banned in Italy?

According to Italy's minister of agriculture, food sovereignty and forestry, Francesco Lollobrigida, the ban will focus on photovoltaic systems placed on the ground in areas classified as agricultural.

Why did Italy enact a photovoltaic decree?

The final aim of the decree is to "avoid desertification" of Italian agricultural land. "We wanted to regulate the use of photovoltaic panels, and we believe that the land serves to produce and energy production must be compatible with agricultural production," said Minister of Agriculture Francesco Lollobrigida.

Can agrivoltaics be expropriated in Italy?

In fact, Italian law does not allow for expropriation for solar PV and agrivoltaics. While it is possible to expropriate land for grid works, in most cases such works involve underground cables, which does not impede agricultural activities.

Will agrivoltaic projects be banned?

However, the decree will not prevent agrivoltaic projects where solar panels are installed above fields of crops without interfering with productivity. Solar plants on non-productive agricultural land such as quarries and solar facilities financed under the recovery and resilience plan framework will also be exempt from the ban. Have you read?

Will solar be allowed in Italy?

The decision to implement this law has been met with some resistance. Italian solar association Italia Solare wrote a letter to President Meloni calling for clarification on areas where solar would be permitted, as well as clear authorisation procedures.

The decree's overarching objective is to safeguard Italian agricultural land from degradation, thereby preventing desertification. Minister of Agriculture Francesco Lollobrigida ...

The Italian government has banned the installation of ground-mounted solar panels in agricultural areas, citing the need to stop the "uncontrolled" installation of photovoltaic ...

Applicable to PV projects with a capacity of more than 20kW, the policy is affecting as much as 13GW of solar assets in Italy, according to one estimate, and is set to remain in ...

Italy bans ground-mounted solar panels on agricultural land ... "The development of the photovoltaic sector, which in other European countries is attracting investments and growth, will be hindered in Italy," added Rocco ...

The court accepted the claims of Italian developer X-Elio Italia 5 S.r.l. that the province of Taranto, the Italian Ministry for Cultural Assets and Environments, and the regional ...

Download our free Special Edition: Dual use of land: New special on Agri-PV. Criticism came from Italia Solare. According to the industry association, the new regulation ...

Italy's National Energy and Climate Plan (NECP) includes specific targets for storage technologies Italy's storage targets Italy's target for the share of renewable electricity ...

PV technology is expected to play a crucial role in shifting the economy from fossil fuels to a renewable energy model (T. K&#229;berger, 2018).Among PV panel types, Chat online U.S. Bans ...

From pv magazine Italy The Italian Constitutional Court has declared the Sardinian moratorium on renewable energy projects as unlawful.

From pv magazine Italy. The Italian government has issued a new decree that prohibits the deployment of large-scale solar plants on productive agricultural land. The final aim of the decree...
