

Does JD logistics have hydrogen-powered heavy-duty trucks?

January 30, 2024 -- JD Logistics, the logistics division of JD.com, today announced its large-scale implementation of hydrogen-powered heavy-duty trucks, marking a first in China's logistics sector. This initiative aligns with the company's long-standing commitment to clean energy usage and environmental stewardship.

Who is JD logistics?

JD Logistics has also implemented green transportation solutions for renowned industry leaders, including BMW and Amway (China). As the first logistics company in China to establish science-based targets (SBTi), JD Logistics is at the forefront of advocating a "supply chain shared carbon footprint" approach.

Is JD logistics a green company?

JD Logistics continues to demonstrate its commitment to green transportation by diversifying its environmentally friendly vehicle fleet. Alongside hydrogen vehicles, the company has expanded its use of electric logistics vehicles, including battery swap vehicles, electric tractors, and methanol-powered small trucks.

Why should you choose JD logistics?

By tailoring transportation methodologies to the specific needs of various cargo types, the company achieves heightened operational efficiency while minimizing lowering both energy use and carbon emissions. JD Logistics has also implemented green transportation solutions for renowned industry leaders, including BMW and Amway (China).

How many warehouses does JD Logistics have?

JD Logistics has built over 100 warehouses on five continents with a 100% coverage of product's source areas. The construction of overseas warehouses helps to reduce logistics costs, guarantee the authenticity of the products and improve purchasers' shopping experience.

Does JD logistics have a 5g-powered Logistics Park?

JD Logistics also launched its first 5G-powered smart logistics park in Beijing in October 2019. The facility implemented real-time monitoring systems that detect and analyze the warehouse, tracking the location and routes of forklifts and pallets in real time.
