

Where is CNPC Jichai Power Company Limited located?

CNPC Jichai power company limited (CNPC JCPC) is located in the economic development zone of the Jinan city, Shandong province. The company was founded in 1920 and is the only internal combustion engine manufacturing enterprise belonging to CNPC .

Are jichai products certified?

Jichai products have been certified by the Russian Marine Classification Society and China Classification Society. CNPC Jichai power company limited (CNPC JCPC) is located in the economic development zone of the Jinan city, Shandong province. The company was founded in 1920 and is the only internal combustion engine-JICHAI POWERCOMPANY LIMITED

Who makes jichai engine?

The company was founded in 1920 and is the only internal combustion engine manufacturing enterprise belonging to CNPC. In 1965, Jichai successfully developed 12V190 high power diesel engine, which filled in gaps of national oil drilling power. In 1988, Jichai produced the first high power gas engine of China.

What does jichai do?

Jichai receives and processes service information 7\*24 hours, responds quickly to customers' technical service requirements, and successfully solved.

The advanced technology and mature parts and components of the current international high-power internal combustion engine industry are adopted, so that the engine can not only expand the power of the original 190 series diesel engine, but also make great progress in improving the average effective pressure, reducing fuel consumption and ...

It is a highly pressurized engine with full intellectual property rights developed by Jichai and AVL Of Austria. It is a series of medium-speed engines with high pressurization, great success, low fuel consumption, high reliability, and long life, which is developed by Jichai and AVL of Austria which Jichai has 100% intellectual property rights.

The new energy and new business formats focus on six areas: centrifugal compressors, hydrogen compressors, electrochemical energy storage business, intelligent refueling machine, charging and replacing business, and gas turbines, and vigorously develop coal-bed methane decarbonization and highly mineralized water treatment technologies to ...

The 24 th China International Petroleum & Petrochemical Technology and Equipment Exhibition (CIPPE 2024) was held in Beijing from March 25 to 27. CNPC Kunlun Manufacturing Co., Ltd co-set up the Kunlun Manufacturing Equipment Exhibition Area with 5 CNPC equipment enterprises and 1 secondary subsidiary, focusing on displaying CNPC's ...

China Electricity And Industry Power Manufacture Visit Here to Find the Electricity And Industry Power That You are Searching for.

On September 1st, news came from the overseas technology marketing service company that the JICHAI 16V natural gas generator set applied to the CNOOC "Offshore Oil 161" oil extraction platform has accumulated over 85000 hours of operation, providing strong support for China's deep-sea exploration and development with "domestically manufactured" technology.

The electrochemical energy storage system applied in the Tarim Oilfield this time is the largest single energy storage project under construction by the company in recent years, and it is also an important step taken by the company in building a unique energy equipment product chain system manufacturing integration and comprehensive service ...

Our electrochemical energy storage product. Relying on the new energy industry manufacturing base of PetroChina, Jichai focuses on three core components: DC system, ...

On November 3rd, news came from Yecheng, Kashgar, Xinjiang that the company's 125 MW/500 MWh electrochemical energy storage system, which was applied to the first market photovoltaic grid connected power generation project in the Tarim Oilfield, has successfully connected to the grid.

On June 29th, news came from the New Energy Technology Branch that China Petroleum's first zinc bromine liquid flow battery energy storage system, produced and manufactured by CNPC JICHAI POWER COMPANY LIMITED, has completed load debugging at the Mahu 078 well site in Xinjiang Oilfield.

On June 29th, news came from the New Energy Technology Branch that China Petroleum's first zinc bromine liquid flow battery energy storage system, produced and ...
