Large-scale energy storage system safety

Are grid-scale battery energy storage systems safe?

Despite widely known hazards and safety design,grid-scale battery energy storage systems are not considered as safeas other industries such as chemical,aviation,nuclear,and petroleum. There is a lack of established risk management schemes and models for these systems.

Can a large-scale solar battery energy storage system improve accident prevention and mitigation? This work describes an improved risk assessment approach for analyzing safety designs in the battery energy storage system incorporated in large-scale solar, which can enhance accident prevention and mitigationthrough the incorporation of probabilistic event tree and systems theoretic analysis.

What happens if a large energy storage system malfunctions?

Any large energy storage system has the risk that energy released in malfunction will be uncontrollablein ways that will do major damage. BESS can release electrochemical energy in the form of thermal runaway or "battery fires".

Is systemic based risk assessment suitable for complicated energy storage system?

This paper demonstrated that systemic based risk assessment such Systems Theoretic Process Analysis (STPA) is suitable for complicated energy storage systembut argues that element of probabilistic risk-based assessment needs to be incorporated.

Are safety engineering risk assessment methods still applicable to new energy storage systems? While the traditional safety engineering risk assessment method are still applicableto new energy storage system, the fast pace of technological change is introducing unknown into systems and creates new paths to hazards and losses (e.g., software control).

How to reduce the safety risk associated with large battery systems?

To reduce the safety risk associated with large battery systems, it is imperative to consider and test the safety at all levels, from the cell level through module and battery level and all the way to the system level, to ensure that all the safety controls of the system work as expected.
