

What is Lesso & how does it work?

From 405W-720W, LESSO covers the need of residential, industrial, commercial and utility-scale projects, provides more green energy to customers with full-automatic production lines and advanced technologies. Besides solar modules, energy storage is also an essential part of the PV system.

How does a LESS (Less Energy Storage System) work?

A LESS (Less Energy Storage System) fully charges its energy storage with solar energy every day and uses 10 kilowatt-hours of storage every night. They have a solar feed-in tariff of 10 cents. Over 10 years,a home with a LESS would receive \$3,250 less in solar feed-in tariff,resulting in less money off your electricity bills.

Who is Lesso?

LESSO is your trusted partner in building a cost-effective, reliable, durable, intelligent, and highly efficient PV storage and charging integrated system. Offering residential off-grid and grid-tie solutions, cutting-edge technology, advanced intelligent manufacturing, and commercial energy storage solutions.

Who is Lesso solar?

LESSO Solar is a comprehensive new energy groupspecializing in research,production,sales, and service. Our business includes centralized ground-mounted,industrial,commercial, and residential solar solutions.

Why should you choose Lesso?

LESSO is committed to buiding a new sustainable energy ecosystem for humans with advanced solar power technology. If you're in search of a reliable PV system manufacturer,look no further than LESSO. Our R&D team is adept at tailoring complete PV systems to match project-specific usage scenarios and electricity consumption.

Where is Lesso located?

LESSO America: Our U.S. branch,based in Coronawith four warehouses nationwide,has 15 years of experience in building materials,photovoltaic products, and power plant projects. LESSO Indonesia: Located in Semarang, this branch covers 130 acres and has a 2.4GW production capacity,making it the largest photovoltaic enterprise in Indonesia.
