

How much waste is generated in Slovenia a year?

Quantities of waste are growing in Slovenia, and on average slightly more than 7 million tonnes of waste are generated each year, of which more than 900,000 tonnes are a municipal waste - about 450 kg per inhabitant, according to data from Slovenian Environment Agency (ARSO).

Does Slovenia have a sustainable waste management system?

Finding sustainable solutions for waste in EU countries is more and more in the focus. Slovenia has tackled this problem by building the Regional Centre for Waste Treatment and Recovery (RCERO) in its capital city of Ljubljana. It is a long-term solution for managing the waste of a third of Slovenia's population.

Does Slovenia have a waste-to-energy facility?

Slovenia used to have no waste-to-energy (WTE) facility, and its waste management strategy used to rely on exports. Following further considerations, the state decided to build a waste treatment plant including an energy production facility.

What is the biggest environmental project in Slovenia?

The RCERO is the biggest environmental project in Slovenia supported by the EU Cohesion Fund. The investment into the RCERO Ljubljana project totals EUR 155 million.

[Ljubljana Lithium battery crushing and recycling equipment trusted the company] -- The production and sales, Xingmao brand Lithium battery crushing and recycling equipment series ...

The optimisation of door-to-door collection frequency improved Snaga Ljubljana's operational efficiency. It reduced the time needed to collect the same amount of waste by 10 per cent and shortened collection routes by 17 per cent. [15] This ...

Find a collection point for waste electrical and electronic equipment, waste lamps, waste batteries and waste candles. Find a service center, reuse center, collection campaign or appliance ...

Once your requirements are understood, a collection program will be established to recycle your batteries and maintain compliance. Our team will educate your staff on safe ...

waste portable batteries and accumulators (WPBA), waste industrial batteries and accumulators (WIBA), ... they are collected separately and sent for recycling. My light bulb broke. What ...

Batteries pose a fire hazard both at disposal transit and in recycling sortation machinery. Fires at recycling facilities have been on the rise and the number 1 cause has been lithium ion batteries. Why is it important to recycle batteries? ...

Na Mestni občini Ljubljana sodelujemo v veliki ozaveševalno-zbiralni akciji odpadnih prenosnih baterij in akumulatorjev. Prinesi stare baterije, v okviru katere bodo baterije zbirali tudi učenci 38 ljubljanskih osnovnih šol.

. Image: Li-Cycle. It will be in the interests of more or less everybody involved in the "broader lithium-ion battery supply chain" to establish effective recycling ecosystems, ...

In 2007 recycling of packaging waste reached 47 %, exceeding the 2007 target of 25-45 %. The target for 2012 envisages 55-80 % recycling, and for certain materials including ...

Find a collection point for waste electrical and electronic equipment, waste lamps, waste batteries and waste candles. Find a service center, reuse center, collection campaign or appliance rental shop and protect the environment. Check if you ...

In terms of the share of waste separated for recycling, Ljubljana is among the very best of European cities of comparable size. In the near future, Snaga expects even better ...

The following is considered waste electrical and electronic equipment: electronic tools and sports equipment with electrical or electronic parts. Waste electrical and electronic equipment does ...

Slovenia-based Andrada Group plans to build a battery recycling plant in Alsószolca, in northeastern Hungary. Andrada is building the world's most sophisticated battery recycling plant in Alsószolca, and the largest ever ...

After being notified that the books are ready, you may pick them up in the library. They will be waiting for you for two more days after you have received the notification. The cost of ...

Together we are creating a greener world More production - more pollution ZEOS - waste management Recycle - reduce CO2. We collect waste electrical and electronic equipment, lamps, batteries and candles. We are also encouraging ...

Wastecare's specialist treatment and recycling facilities manage most categories of hazardous and challenging waste in bulk. Our specialist portable battery recycling facility has a 25,000 tonne annual capacity. When this is fulfilled, it ...
