

# Minutes of the european residential energy storage conference

When is the energy storage global conference 2025?

The eighth edition of the Energy Storage Global Conference (ESGC) will take place on 14 - 16 October 2025 in Brussels. Latest insights on energy storage policies, markets and technologies and applications. Networking opportunities during the conference, as well as during our dinner events.

When is the energy storage global conference (ESGC) 2023?

The sixth edition of the Energy Storage Global Conference (ESGC) organized by EASE took place on 10 - 12 October 2023 as a hybrid event at Hotel Le Plaza in Brussels, as well as online.

How many delegates attended the energy storage global conference?

More than 220 delegates attended the Energy Storage Global Conference, which saw 49 speakers from the industry, research centres and international bodies from the electricity, renewables and storage sectors, as well as representatives from the European institutions, and national administrations.

Is Europe a leader in residential energy storage?

While China and the US dominate the market, Europe leads in residential energy storage- and this is set to expand on the continent by nearly tenfold this decade. However, by 2023 Europe will give up its leadership position to the Americas, where there will be further investment in the residential segment.

What is EES Europe 2022?

EES Europe 2022 is Europe's largest and most international exhibition for batteries and energy storage systems. It will focus on the storage system market for private homes, commercial and industrial enterprises.

How did the European storage market perform in 2020?

According to the study, newly installed capacity from storage systems in private households rose by 44% in 2020 compared to the previous year. Despite difficult market conditions due to the COVID-19 crisis, approx. 140,000 systems installed saw the European storage market exceed 100,000 installed battery units for the first time.

Sunwiz. Note: Europe = EU average including Italy, Germany. 0 20 40 60 80 100 2020 2022 2024 2026 2028 2030 GW Others Japan Australia Italy United States Germany 0% ...

According to the European Association for Storage of Energy (EASE), the EU will need 200 GW of energy storage by the end of the decade and 600 GW by 2050. In 2022 alone, Europe grid-scale energy storage demand will see a mighty ...

In a plenary opening and two parallel streams of lectures over three days, experts from science, practice, politics and society focus on the current state of knowledge about energy storage. In the plenary sessions,
