

# National energy administration calls for halting energy storage

Why did the NEA order the use of energy storage?

In stipulating to its subsidiaries and major state-owned enterprises that the proportion taken up by solar and wind power in the national power generation mix must rise to 11% this year, the NEA also ordered the use of energy storage for the first time.

How will the NEA improve China's energy storage capacity?

The NEA said it will actively strengthen planning, improve standard systems and refine the market mechanism to promote the high-quality development of new-type energy storage. China's energy storage capacity is expanding to facilitate the utilization of growing renewable power amid the country's efforts to advance its green energy transition.

How is the government advancing energy storage technologies?

The government has been continuously advancing energy storage technologies, with several compressed air energy storage, flow battery storage, and sodium-ion battery storage projects put into operation across the nation, Bian Guangqi, an NEA official, said at the conference.

Will China's new energy storage sector grow in 2024?

BEIJING -- China's new energy storage sector saw rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy Administration.

Will new energy storage solutions help the northwestern region?

Given the rapid expansion of renewable installations, accelerating the development of new energy storage solutions will be a crucial breakthrough for the northwestern region. This will help mitigate renewable curtailment and ensure a more resilient and secure power grid, she added.

Is China's energy storage capacity poised for significant growth?

A driver charges his new energy vehicle in Chongqing. [SUN KAIFANG/FOR CHINA DAILY] Fueled by innovative technologies and rapid advances in the renewables sector, China's energy storage capacity is poised for significant growth, the National Energy Administration said on Wednesday.

(National Energy Administration) 2008, (?), ...

Today, we have invited Mr. Zhang Jianhua, administrator of the National Energy Administration (NEA), to brief you on fully implementing the guiding principles of the 20th CPC ...

The company launched a series of energy storage products recently on the sidelines of the 2023 International Forum on Energy Transition held in Suzhou, Jiangsu province, including energy storage ...

## National energy administration calls for halting energy storage

Stronger efforts are needed in promoting the development of the energy storage sector, with an emphasis on developing new battery types, as China demands more flexible ...

Zhang Tianren, also chairman of Chinese battery maker Tianneng Group, suggested the national legislative body encourage the development of safer and more cost ...

The country has vowed to realize the full market-oriented development of new energy storage by 2030, as part of efforts to boost renewable power consumption while ...

In April of this year, the National Energy Administration issued the "Notice on Promoting the Grid Connection and Dispatch Utilization of New Energy Storage" (National ...

President Donald Trump has wasted no time following through on previous pledges to neuter clean energy legislation enacted by his predecessor and establish new policies that promote the burning of more fossil fuels under ...

BEIJING - China's National Energy Administration (NEA) has made specific arrangements to ensure energy security and promote green and low-carbon development next year, said the administration chief. The tone of next ...

The plan, jointly published by China's top economic planner, the National Development and Reform Commission and the National Energy Administration, also sets out ...

Sandia National Lab will demonstrate an innovative 18-hour storage technology using particle-based thermal energy storage with sand as the medium and an existing ...

National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy ...

With Chinese solar project developer and PV glassmaker Xinyi having this week moved to add battery storage to its solar generation portfolio, its prediction storage would be ...

Today, we have invited Mr. Zhang Jianhua, administrator of the National Energy Administration (NEA), to brief you on relevant developments and answer your questions. Also ...

The main goals of new energy storage development include: Large-scale development by 2025; Full market development by 2030. The guidance covers four aspects: 1) Strengthening ...

Technicians inspect a solar power storage plant in Huzhou, Zhejiang province, in April. [Photo by Tan Yunfeng/For China Daily] China aims to further develop its new energy storage capacity, which ...

## National energy administration calls for halting energy storage

On March 21, the National Development and Reform Commission (NDRC) and the National Energy Administration of China issued the New Energy Storage Development Plan During China's "14th Five-Year Plan" Period. The ...

SINGAPORE, Dec 13 (Reuters) - China has appointed Wang Hongzhi as head of the National Energy Administration, according to a notice by its human resources ministry on Friday.

China's installed new-type energy storage capacity had reached 44.44 gigawatts by the end of June, expanding 40 percent compared with the end of last year, the National ...

Fueled by innovative technologies and rapid advances in the renewables sector, China's energy storage capacity is poised for significant growth, the National Energy ...

President Donald Trump pledged today to declare a "national energy emergency" as one of the first acts of his second term in office and has signed a series of executive orders designed to ...

In June 2023, China achieved a significant milestone in its transition to clean energy. For the first time, its total installed non-fossil fuel energy power generation capacity surpassed that of fossil fuel energy, ...

While the Biden administration consistently claims it has made emissions reduction a significant priority, its actions behind the scenes with permitting delays, a rapid decline in oil ...

"Energy storage facilities are vital for promoting green energy transition with substantial potential, as the central government calls for a new energy-based power system," ...

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.

China has unveiled a five-year plan, from 2021 to 2025, on developing energy technologies to propel green growth and digital transformation of the energy sector, the ...

Trump's executive order withdrawing from the Paris accords eliminates that goal, and goes further to halt all payments on foreign aid the U.S. promised to help poorer countries transition to clean energy. For much of the ...

China has set a target to cut its battery storage costs by 30% by 2025 as part of wider goals to boost the adoption of renewables in the long term decarbonization plan, ...

China's National Energy Administration has made specific arrangements to ensure energy security and

## National energy administration calls for halting energy storage

promote green and low-carbon development next year. App. HOME; ...

he National Energy Administration (NEA) is a state administration under the National Development and Reform Commission (NDRC). The NEA drafts China"s national ...

In recent years, especially since the 18th CPC National Congress, under the strong leadership of the CPC Central Committee, the energy industry has thoroughly implemented Xi Jinping thought on eco-civilization and a new ...
