What is thermal energy storage in Korea?

In Korea, there have been studies on thermal energy storage (TES) since early 1980s. Both water heat storage system and PCM-based latent heat storage system have been examined almost at the same time. Thanks to night thermal storage power services, a lot of water heat storage systems have been distributed.

Can dynamic ice slurry be used in building energy saving?

This paper introduced the common binary ice-making methods and their current situation as well as the research hot topics. Evaporative suppercooled water method for dynamic ice slurry producing is analyzed in detail as a new method. At last the application potential of dynamic ice slurry in building energy saving is briefly introduced.

Can dynamic ice slurry solve Peak-Valley electricity demand and building energy saving fields?

Abstract: Dynamic ice slurry, one of the most efficient ice-storage methods, has potential in solving peak-valley electricity demand and building energy saving fields. This paper introduced the common binary ice-making methods and their current situation as well as the research hot topics.

Is ice storage a latent heat storage system?

Since early 1990s, the ice storage system was distributed. Since mid 1990s, in addition, an ice slurry system was introduced. Entering the new millennium, there have been empirical studies on micro-encapsulated PCM (MPCM). However, the latent heat storage system has not been widely distributed except for an ice storage system.

Can evaporative suppercooled water produce dynamic ice slurry?

Evaporative suppercooled water method for dynamic ice slurry producing is analyzed in detail as a new method. At last the application potential of dynamic ice slurry in building energy saving is briefly introduced. Conferences > 2010 International Conference...

Are water heat storage systems based on PCM-based latent heat storage system?

Both water heat storage system and PCM-based latent heat storage system have been examined almost at the same time. Thanks to night thermal storage power services, a lot of water heat storage systems have been distributed. Since early 1990s, the ice storage system was distributed.
