Which battery energy storage projects have been successful in Western Australia?

2.6GWh of utility-scale battery energy storage projects have been successful in Western Australia's first Capacity Investment Scheme tender. Energy storage developer Energy Vault is set to fully acquire the 125MW/1GWh Stoney Creek battery energy storage system (BESS) in New South Wales, Australia, from Enervest Group.

What is energy storage & how does it work?

One major hurdle renewable energy has faced is its intermittent nature--what happens when the sun doesn't shine or the wind doesn't blow? This is where energy storage systems come into play. Large batteries can store energy when production is high and release it when demand soars, ensuring a consistent power supply.

What's going on at the Energy Storage Summit Australia 2025?

NSW's BESS pipeline, PHES in Tasmania and the 'home of utility-scale storage' were discussed at the Energy Storage Summit Australia 2025. ESN Premium discusses the ongoing adaptation of EV battery lines to stationary storage applications with Jaehong Park, CEO of LG ES Vertech.

What is new-type energy storage?
