Sale of Public Assets. The most common form of privatization is the sale of publicly owned enterprises, also called state-owned enterprises or SOEs, into private ownership. In developed nations this form of privatization has involved the widespread sell-off of SOEs and utilities that were established or nationalized in the two decades following World War II.

Although some traditional state-owned and -run enterprises have performed well, and indeed were often formed by nationalizing private-sector companies that were either too small to exploit economies of scale or too large to prevent monopolistic abuse, there was an increasing awareness during the 1980s that a lengthy period of state ownership ...

BEIJING -- As a three-year action plan kicks economic reform in China into high gear, changes are gathering steam to remodel the country's State-owned enterprises, China's economic backbone.. The 2020-2022 action plan, part of the decades-long effort to transform SOEs into competitive, modern enterprises, is expected to leave a strong mark on the world's ...

State-owned enterprises are essentially agents of the state and are thus bound by state policies and directives via a channel of direct influence or control, especially in the case of firms dependent on the state for resources, market access, or other essential support (Hart, 2003). Thus, a state authority that prioritizes climate change ...

State-owned enterprises (SOEs) are important components of the Chinese economy. Although SOEs are generally considered inefficient in operations, China's economy, which relies heavily on SOEs, has been highly successful over the last four decades. This indicates the importance of SOEs in China's past and future economic success.
