

How will China's energy storage industry grow in 2025?

Driven by both market and policy factors, the growth of energy storage is expected to be explosive, creating a strong demand for the industry's supply chain. Once again, the China Electricity Council and the State Grid Corporation of China will collaborate to host Shanghai International Energy Storage Technology Application Expo (ES Shanghai 2025).

Why is energy storage important?

Energy storage is an important component and crucial technique in renewable energy system. It is the basis of realizing the wide application of distributed energy and micro grid, realizing energy interconnection and sharing, and realizing network integration.
