

Do electric cars work in Reykjavik?

City dwellers can zip about in small electric cars, as well as travel further afield. The capital of Reykjavik is a city of course, but it's a small one with plenty of space. Therefore, creating a reliable network of charging stations has been reasonably straightforward.

Are there charging stations in Iceland?

According to PlugShare there are plenty of charging stations in Iceland and they are located abundantly around the whole island to make sure you can always plug and charge when in need. How do you charge your car? Charging your EV is as simple as charging your phone.

Does Reykjavik offer free car charging?

The capital of Reykjavik is a city of course, but it's a small one with plenty of space. Therefore, creating a reliable network of charging stations has been reasonably straightforward. In some circumstances, charging your car is even free as some shopping centers and employers offer free charging as a perk or incentive.

Can you rent an electric car in Iceland?

The Iceland electric car charge for a rental is pretty much on par with hiring a petrol vehicle. As mentioned, you're sure to find electric car charging stations every 100km at fuel stations around the Ring Road, as well as surrounding many larger hotels and some public buildings and shopping centers.

What are EVs in Iceland?

EVs are vehicles that use one or more electric motors for propulsion. There are three types of EVs; BEV, PHEV and HEV. EVs are a fast growing commodity in Iceland where charging stations are now scattered all around the country. Tesla Model 3 was the most sold car in Iceland in 2020. What are Electric Vehicles (EVs)?

Why is electric charging so popular in Iceland?

Two of the most significant factors are Iceland's small population and relatively small landmass. This means that for a high percentage of journeys around the country, electric charging works well. Let's look at these factors in a little more detail. The population of Iceland is around 330,000.
