

What's going on in Riga?

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable electricity, and the development of hydrogen and alternative fuel technologies.

Will a Solar Park transform Riga into green energy?

Home Port News Major solar park set to transform port of Riga into green energy... On 9 September, an agreement was signed between the Freeport of Riga Authority and Lithuanian company SNG Solar for the lease of land in the Spilve Meadows area of the Latvian port.

How much will SNG solar invest in the Freeport solar park?

SNG Solar won the land lease auction held by the Freeport of Riga Authority, and the Freeport's board approved the agreement in early May. The total investment in the solar park is projected to be between US\$66 and 88 million.

Swedish tech company Anodox Energy Systems has announced plans to produce electric vehicle batteries in Latvia, with the first factory in the Port of Riga expected to be operational by December 2022. A second factory for rapidly ...

Development of New Energy Storage during the 14th Five -Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system. ...

The new energy storage system marks a major advancement for Latvia, which is working to stabilize its energy supply while supporting sustainable development. As the largest energy ...

Riga Energy Storage. The usage of energy storage devices can help use the solar power more efficiently and smarter. This paper deals with the optimization of a proposed solar panel array ...

Rolls-Royce will supply an mtu EnergyPack QG large-scale battery storage system with an output of 80 MW and a storage capacity of 160 MWh. This makes the system one of the largest battery storage systems in the EU. ...

Have you replaced the energy storage charging pile. As one of the new infrastructures, charging piles for new energy vehicles are different from the traditional charging piles. The "new" here ...

Once completed, the project will be one of the largest solar parks in the Baltics. In May 2023, Latvian developer PurpleGreen Energy B announced plans for a 400 MW solar ...

The new car batteries that could power the electric vehicle. The new cell instead makes lithium oxide (Li₂O),

which can hold four. Those extra electrons translate to a higher energy density, ...

Germany-based Rolls-Royce has been awarded a contract to supply two large-scale battery energy storage systems to Augstsprieguma tīkls (AST), Latvia's transmission system operator, with a...

This new energy storage system has a capacity of 20 MWh, enabling the park to store surplus energy generated during periods of high wind and supply it back to the grid when ...

Haralds MILLERS, MBA from Riga Business School, M. Sc. Eng. in electrical and power engineering from Riga Technical University. Having worked in the energy industry for ...

Latvenergo said it will build the battery energy storage system (BESS) projects in response to increasing demand for flexibility and to synergise with its hydropower, gas-fired plants and solar and wind capacities under ...

Battery electricity storage is a key technology in the world's transition to a sustainable energy system. Battery systems can support a wide range of services needed for the transition, from ...

Revenues and Regulations: Enabling Large-Scale Regional Energy Storage Deployment. When: September 23-24, 2025. Where: Warsaw, Poland. The energy storage industry is experiencing rapid growth. To discuss key ...

. October results reveal that client interest in energy sector opportunities has remained strong. During the month, on Ventus Energy platform one new funding project, and ...

The Ministry of Energy issued a call for applications for companies to install high-capacity energy storage systems on February 7, only a day before Lithuania alongside Estonia ...

Ports are center pieces of hydrogen valleys - production, storage and demand; with extra infrastructure and distribution capacity to house innovation and industry projects and partnerships. With three key ports in Latvia - Riga, Liepaja and ...

Procurement Summary. Country : Latvia Summary : Construction of Battery Energy Storage System at Jsc Latvenergo Riga Hydro Power Plant Deadline : 28 Dec 2024 Other Information. ...

Over the next five years, SNG Solar plans to build a solar power plant with a capacity of 100 MW on 1.77 million square meters, generating approximately 100,000 MWh of green electricity annually. The Spilve ...

Niam and Evecon will deploy 84MW of solar power and 26MW of energy storage across 11 project sites in Latvia. Image: Niam Infrastructure. News from the Nordics and the Baltics, with BESS projects launched in ...

The 10MW/20MWh project's opening event, attended by Latvia's energy minister Kaspars Melnis. Image: Hoymiles Power Latvia. In news from Europe's Baltic Sea region, Latvia's first utility-scale battery storage project ...

Latvia launched new energy saving measures, ... Gas Storage Latvia owns the only functioning gas storage ... Latvia installed 0.04 GW of solar power capacity (vs. 0 GW in ...

Europe and China are leading the installation of new pumped storage capacity - fuelled by the motion of water. Batteries are now being built at grid-scale in countries ...

January 2021 . Energy cells, a special-purpose wholly-owned subsidiary of EPSO-G Group, was established.. January 2021. An international tender was launched for the design, manufacture, and installation of a battery ...

Spanggaard said that European Energy is currently considering power purchase agreements for the 155 MW solar power plant, but in general, Latvia needed "more experience" structuring PPAs and ...

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with ...

The 100 MW solar facility will be constructed on a 177.2-hectare site in Spilve Meadows, on the left bank of the Daugava River in Riga. This project is part of the Freeport's ...

Battery energy storage systems (BESS) ... Let us help answer your questions about green energy. Energrid's mission is to provide affordable, complete energy infrastructure to everyone in Latvia. Because electricity is the foundation for a ...

Latvia has taken a significant step towards a greener future with the commissioning of its first utility-scale battery energy storage system (BESS). The 10MW/20MWh BESS, ...

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north-eastern Ventspils region. The project is ...

Renewable energy. Wind energy is a form of energy that is completely renewable. Sun constantly creates an air flow in the atmosphere - wind - which captured can be used to produce electricity. Harnessing wind doesn't require any kind of ...

RIGA, Nov. 1 (Xinhua) -- Renewable energy company Utilitas Wind on Friday inaugurated the largest battery energy storage system (BESS) in Latvia to date, local media ...
