

# Sales commission system plan for energy storage industry

Is energy storage a precondition for large-scale integration and consumption?

So to speak, energy storage is the precondition of large-scale integration and consumption of RES. However, China's energy storage industry is at the exploration stage and far from commercialization. This restricts the development of RES to certain extent. For this reason, this paper will concentrate on China's energy storage industry.

Does energy storage industry need a policy guidance?

Sungrow Power Supply Co., Ltd.: energy storage industry needs the policy guidance urgently. Machinery & Electronics Business; 2015-6-22: A06. Policy and innovation are key factors for the development of energy storage technology. China Electric Power News; 2016-4-28: 008. Lin Boqiang.

What is the target cost for the marketization of energy storage industry?

The target cost for the marketization of energy storage industry was about 200 dollars/kW h, equivalent to 1246 yuan/kW h. However, at present, the cost of PbAB is about 1000 yuan/kW h and the cost of NaS battery, LIB is about 4000 yuan/kW h. High cost limits the commercialization of energy storage industry.

What is the White Book for energy storage industry in 2014?

White book for energy storage industry in 2014. China Energy Storage Alliance 2014. China Electricity Council. The study on the development policy of energy storage industry. China Power Enterprise Management 3; 2015. p. 24-28. Global energy storage distribution: the US accounts for 40% and Japan accounts for 39%.

What is the energy storage system?

The energy storage system includes 1.5 MW/2 h LiB, 1.2 MW/2 h VRFB. And the wind power of 99 MW had been put into operation in August 2012. The system is connected with the 35 kV bus. Through intelligent control, the system stores and releases power according to the coordinating with wind power.

What is the energy storage system subsidy policy?

The plan focuses on PV cells and fuel cells. March 2011: after the earthquake, the government allocated 1.51 billion yen for energy storage technology including fuel cells, energy trading system and battery to improve energy consumption rate. April 2012: family energy storage system subsidy policy was proposed.
