

Sinopec has built two such stations at the Qianjiang and Zhijiang West service areas on the Shanghai-Chongqing Expressway, with a daily hydrogen-refueling capacity of 1,000 kilograms. Sinopec has also established ...

The NDRC said new energy storage that uses electrochemical means is expected to see further technological advances, with its system cost to be further lowered by more than ...

Sinopec currently produces 3.5 million tons of hydrogen per year. In 2020, Sinopec started to advance and accelerate the construction of an integrated hydrogen energy industry chain ...

The race to transition to a net-zero economy has also opened up prospects for green hydrogen as a clean energy source for heating, energy storage, alternative fuel, or fuel-cell vehicles.

Sinopec has carried out an "Energy Efficiency Improvement" plan and "Green Enterprise Action", taking a holistic approach to implement eight major carbon peaking actions to promote the ...

Zhongyuan gas storage group Photo: Courtesy of Sinopec. The largest underground natural gas storage cluster in northern China, with a capacity of 10.03 billion cubic meters, was put into operation ...

The southwest headquarters of Sinopec Green Energy will focus on the comprehensive development and utilization of "geothermal energy +" integrated with various ...

Creating an artificial carbon cycle model in the push for peak carbon emissions. BEIJING, China, July 6, 2021 - China Petroleum & Chemical Corporation (HKG: 0386, "Sinopec") has initiated ...

SINOPEC Kantons Holdings Limited SINOPEC Kantons Holdings Limited (Kantons Holdings) is a Hong Kong-listed red-chip subsidiary. Kantons Holdings is set up to focus on global oil storage ...

The vanadium redox flow batteries (VRFBs) developed by Sinopec are designed to deliver reliable energy storage solutions that support renewable energy integration. Unlike ...

By investing in energy storage solutions, Sinopec not only addresses energy security concerns but also complements national strategies aimed at expanding renewable ...

Sinopec has completed the construction of China's first megaton carbon capture, utilization and storage (CCUS) project. This will reduce carbon emission by 1 million tons per ...

“Sinopec has also endeavored to build up gas storage by achieving 1.69 billion cubic meters of working gas capacity by the end of October, 15.5 percent higher year-on-year,” Li said.

Sinopec has begun the production of green hydrogen made directly from seawater at its Qingdao Refinery. ... Electric Buses and Energy Storage, Navigating Challenges and Opportunities. 26/03/2025. Power to ...

Sinopec is all about green development in Hong Kong SAR! In 1Q 2025, over 70 volunteers from 8 Sinopec subsidiaries in Hong Kong hit up quarterly environmental campaigns in 7 country ...

To address the challenges of flexible hydrogen production under fluctuating new energy, Sinopec has independently developed an integrated configuration optimization software for green ...

PipeChina, CNOOC and Sinopec facilitate energy supply and carbon emission cuts. In recent years, China's State-owned enterprises, or SOEs, have been stepping up construction of storage facilities for liquefied natural gas or ...

Sinopec and CATL's partnership builds on an existing relationship in energy stations, storage, and advanced materials, and will expand to build smart energy microgrids ...

Sinopec and CATL's partnership builds on an existing relationship in energy stations, storage, and advanced materials, and will expand to build smart energy microgrids featuring solar power, energy storage, charging, swapping, ...

The new-energy locomotive, which has zero pollution and only emits water, has broad market prospects for use in large factories, mines and ports, the company said. Liu Wei, ...

In the field of green hydrogen refining, Sinopec has been vigorously advancing centralized wind power and photovoltaic development, laying out mega-scale projects integrating renewable ...

The Volkswagen comprehensive energy station has introduced an integrated intelligent management system of “light, storage, charging, and discharging”, transforming the ...

With a total storage capacity of 10.03 billion cubic meters, the Zhongyuan underground gas storage cluster, including the Wen-23, Wen-96 and Wei-11 underground gas ...

China Petroleum & Chemical Corporation (Sinopec) has revealed that the world's largest LNG storage tank was put into operation at its Qingdao LNG receiving terminal in China.

It has built over 100 hydrogen fueling stations amid efforts to become China's leading hydrogen energy company. Sinopec President Ma Yongsheng said the company will ...

Seizing the major strategic opportunity of hydrogen energy development, Sinopec has, in accordance with the idea of "building 1,000 hydrogen refueling stations, 1 million-tonne green ...

Sinopec Green Energy plans to locate its southwest headquarters in Chengdu Hi-Tech Industrial Development Zone and create various new energy application scenarios. ...
