

Does SMA offer a large-scale energy storage system?

ergy off grid,SMA now offers a large- scale storage concept. this solution intelligently integrates megawatt-class energy storage systems,both with or without a solar system,into the grid. Customers benefit from our 30 plus years of experience in system technology for off-grid hybrid energy supply systems and megawatt-class PV power plants.

What is the SMA commercial storage solution?

The SMA Commercial Storage Solution enables businesses to increase their energy efficiency and reduce their dependency on conventional energy sources. With this solution, businesses can also reduce their energy costs for the long term and regain control of them. [Learn more.](#)

What is SMA energy system large scale?

With the SMA Energy System Large Scale,you can store solar power. This enables you to manage peaks in demand,stabilize grid voltage and reduce energy costs considerably. The SMA Sunny Central Storage UP battery storage system will increase the efficiency of your PV power plant.

Does the SMA energy solution home have a secure power supply function?

The SMA Energy Solution Home may be equipped with the manual secure power supply function SMA Backup Securewhen using the SMA Backup Start. When needed,for example in case of a power outage,the inverter can continue to supply electric current from the battery and the PV system to selected loads by means of a socket connected to the inverter.

What does SMA do?

As an energy management company,SMA develops innovative technologies for future energy supply structures and connects both photovoltaic systems and large-scale storage systems to the public grid.

Why should you choose SMA Sunny central storage up battery storage system?

The SMA Sunny Central Storage UP battery storage system will increase the efficiency of your PV power plant. At the same time,battery storage systems perform important grid management functions. Grid frequency fluctuations are avoided thanks to smart plant control with the Power Plant Manager and grid voltage is restored in seconds.

Direct feed-in of the solar power produced to the utility grid (without intermediate storage) Direct use of the energy produced within the home or business. Storage of surplus solar power in the battery storage system. Withdrawal of energy for ...
