

What is a sodium ion battery?

In the growing market for sodium-ion batteries, several companies stand out for their innovative technologies and products. These companies specialize in developing rechargeable batteries that use sodium ions instead of traditional lithium ions, offering promising alternatives for energy storage solutions.

How much energy does a sodium ion battery have?

The company recently unveiled three sodium-ion battery cell products with energy densities ranging from 140 Wh/kg to 155 Wh/kg. HiNa's sodium-ion batteries are geared towards mainstream market demand, offering advantages such as a wide temperature range and high power.

Who makes Northvolt sodium ion batteries?

Northvolt's sodium-ion batteries are produced without any critical metals, using only globally abundant, low-cost materials. Tiamatis a French company that designs, develops, and manufactures sodium-ion batteries for mobility and stationary energy storage applications.

The world shipped 196.7 GWh of energy-storage cells in 2023, with utility-scale and C& I energy storage projects accounting for 168.5 GWh and 28.1 GWh, respectively, according to the Global Lithium-Ion Battery Supply Chain Database of InfoLink. The energy storage market underperformed expectations in Q4, resulting in a weak peak season with only a 1.3% quarter ...

Here are the leading companies in the Sodium-ion Battery sector: HiNa Battery Technology Co., Ltd. is a Chinese company specializing in high-performance sodium-ion batteries. The company is known for producing ...

In the growing market for sodium-ion batteries, several companies stand out for their innovative technologies and products. These companies specialize in developing rechargeable batteries that use sodium ions instead of traditional ...

Strategic focus on energy storage 2023 Qingdao GP founded 2025 Become a global leader in energy storage battery 2025 2023 The products with S24 technology start mass production. Mass production of sodium-ion batteries has the commercialization 2021 The company started producing products from recycling of waste batteries. 2018 The batteries with a

The energy storage segment consists of manufacturing a new generation of energy storage systems, particularly sodium-ion batteries. It serves various industries, including chemical and automotive. At the end of 2022, HiNa Battery initiated its first GWh-scale sodium-ion battery production line in Fuyang, Anhui province, China.

Explore the top sodium-ion companies of 2025, from Altris AB to Peak Energy, shaping the future of energy

storage. Ex-Tesla Team Launches Sodium-Ion ESS for Solar Hybridisation China Announces Sodium-Ion Battery Procurement at \$150/kWh

In this article, we'll introduce you to the top 10 sodium-ion battery manufacturers in the world, which are leading the development of sodium-ion battery technology and occupying a leading position in the global market.

1. NextThing Technologies: The Future of Home & Utility-Scale Sodium-Ion Batteries. Website. Overview . NextThing Technologies is pioneering a sodium-ion battery system designed for home energy storage, commercial use, and ...

Top Sodium Ion Battery Companies . Step into the future of energy storage with the Top Sodium Ion Battery Companies. Revolutionizing the landscape of rechargeable batteries, these industry leaders harness the power of sodium to ...

Northvolt, a Swedish battery maker, has unveiled its sodium-ion battery technology with an energy density of 160 Wh/kg, developed for use in energy storage systems. This breakthrough positions Northvolt as a key player in the European market for sodium-ion batteries, offering a sustainable and cost-effective alternative to lithium-ion batteries.

See also: Top Energy Storage Companies | Best Solar Storage Products | Top Energy Storage Stocks | Storage News. ... lead, nickel or sodium) as well as Li mining companies as current Li manufacturers. The assets are allocated as follows: 99.81% of net assets are long-term allocations in stocks, while 0.19% constitutes cash (1.15% - long-term ...

HiNa Battery Technology Co., Ltd is a high-tech enterprise that focuses on the research and production of new generation energy storage systems - sodium ion batteries. The company focuses on low-cost, long-life, ...

Explore the top 10 sodium sulfur (NaS) battery companies in 2024 shaping the future of energy storage. Discover their market impact, revenue, innovations, and contributions ...

Researchers make performance breakthrough with sodium-ion. Researchers make performance breakthrough with sodium-ion battery technology: ""A highly promising material for future energy-storage solutions"" Rick Kazmer June 5, 2024 at 6:30 AM · 3 min read

Faradion, one of the Top 10 sodium-ion battery companies, aims to develop sodium-ion technology and bring it to market. Faradion was the first company of the new Millennium to identify and exploit the potential of sodium ...

The demand for sustainable and efficient energy storage solutions is growing rapidly. This trend positions Sodium-ion Battery companies as pivotal players in 2024. Let's explore the top contenders in this emerging

market, ...

Detailed info and reviews on 100 top Energy Storage companies and startups in United States in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more. ... we present a groundbreaking solution to the pressing challenges facing the energy storage industry: Silion Energy's sodium-ion rechargeable batteries. Our ...

Leading battery manufacturers are developing next-generation sodium-ion solutions for applications ranging from home energy storage to grid-scale deployment. This article ranks the top sodium-ion battery companies ...

Company profile: CATL ranks first in top 10 sodium ion battery manufacturers in China, also as leading company in top 10 lithium ion battery manufacturers was established on December 16, 2011. ... Sineng's 2.5MW string PCS MV turnkey solution is meticulously designed to align with the sodium-ion battery energy storage system's wide DC voltage ...

Energy storage system costs stay above \$300/kWh for a turnkey four-hour duration system. In 2022, rising raw material and component prices led to the first increase in energy storage system costs since BNEF started its ...

With sodium's high abundance and low cost, and very suitable redox potential ($E(\text{Na}^+/\text{Na}) \approx -2.71$ V versus standard hydrogen electrode; only 0.3 V above that of lithium), rechargeable electrochemical cells based on sodium also hold much promise for energy storage applications. The report of a high-temperature solid-state sodium ion conductor - sodium v? ...

Future development requires the joint efforts of government, business and society to promote innovation in energy storage technology, reduce costs, and improve the policy and market environment, so as to achieve a ...

Subscribe to Newsletter Energy-Storage.news meets the Long Duration Energy Storage Council Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel ...

As the world embraces sustainable energy, the need for effective energy storage systems is growing rapidly. Europe's energy storage sector is advancing quickly, is home to several top energy storage manufacturers. This ...

"This innovative approach will unlock new possibilities for energy storage systems and foster a new industry ecosystem," the manufacturer said. Sodium-ion cell for utility-scale energy storage . Just as a number of other ...

GE is known for its involvement in various energy storage projects, particularly when it comes to grid-scale battery storage solutions. It continues to be at the forefront of developing and deploying advanced energy

storage ...

Leaders in the BESS Revolution: Top Battery Energy Storage Companies. ... and sodium batteries are gaining traction. This diversification not only provides additional options for consumers but also fosters innovation and competition within the industry. Mergers and Acquisitions: As the energy storage industry matures, consolidation through ...

Veken Holding Group Co., Ltd. Frequency modulation energy storage: Adopting Veken's self-developed sodium energy storage core, equipped with immersed liquid-cooled energy storage technology, which effectively extends the service life of the battery, improves the overall stability of the power station, quickly responds to the power grid, and has a high K-value and high ...

In 2024, the Finland-based company Broadbit and the Japanese company NGK Insulators announced the production of a sodium-ion battery cell with an energy density of more than 200 watt-hours per ...

Traditionally, lithium-ion batteries (LIBs) have dominated the energy storage market, renowned for their high energy density and widespread applicability. However, the challenges associated with lithium's availability, ...

Dive into the future of energy storage with our Top 20 Sodium Ion Battery Companies In china article! Discover how industry leaders are revolutionizing rechargeable batteries, harnessing sodium for sustainable and ...

Sodium battery companies specialize in developing energy storage systems using sodium-ion technology as a cost-effective, sustainable alternative to lithium-ion batteries. Key ...
