

Accumulator which stores a fluid under pressure and is therefore able to release hydraulic energy. Pressurisation is mainly based on gas pressure (air, nitrogen, "hydropneumatic accumulator") and, more rarely, springs or weights (spring accumulator, weighted accumulator).).

Tbilisi hydraulic station accumulator A hydraulic accumulator is a storage reservoir in which an is held under pressure that is applied by an external . The external source can be an engine, a, a raised, or a compressed .An accumulator enables a hydraulic system to cope with extremes of demand using a less powerful pump, to respond mor
