

How many mw did the US storage market add in Q3 2023?

In the third quarter of 2023, and despite significant delays in the market, the US storage market added a record-setting 2,354 MW and 7,322 MWh.

How did energy storage grow in 2022 & 2023?

The US utility-scale storage sector saw tremendous growth over 2022 and 2023. The volume of energy storage installations in the United States in 2022 totaled 11,976 megawatt hours (MWh)--a figure surpassed in the first three quarters of 2023 when installations hit 13,518 MWh by cumulative volume.

Which states installed the most residential storage in Q3 2024?

The residential market set an all-time high with a record-breaking 346 MW of residential storage installed in Q3 2024, a 63% increase over the previous quarter. California, Arizona, and North Carolina led growth, installing 56%, 73% and 100% more residential storage in Q3 than in Q2 - despite residential battery supply shortages.

What is the US energy storage monitor?

The U.S. energy storage monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association. Each quarter, we gather data on U.S. energy storage deployments, prices, policies, regulations and business models.

How many megawatts are installed in a quarter?

As outlined in the American Clean Power Association (ACP) and Wood Mackenzie's latest US Energy Storage Monitor report, the U.S. grid-scale segment saw quarterly installations increase 27% quarter-on-quarter (QoQ) to 6,848 MWh, a record-breaking third quarter for both megawatts (MW) and megawatt-hours (MWh) installed.

What information does energy storage collect each quarter?

Each quarter, we gather data on U.S. energy storage deployments, prices, policies, regulations and business models. We compile this information into this report, which is intended to provide the most comprehensive, timely analysis of energy storage in the U.S.

The U.S. Energy Storage Monitor report from the American Clean Power Association (ACP) and Wood Mackenzie showed a record 4,733 MWh of grid-scale energy storage installed in Q3 2023, surpassing the previous ...
