Investments will be focused on projects in the Kanto region, which comprises the Tokyo Metropolitan area and six surrounding prefectures. Much of the new investment fund's remit is around establishing a new "green financing model" for investments in utility-scale battery energy storage system (BESS) assets in Japan, Gore Street said.

There are three main types of MES systems for mechanical energy storage: pumped hydro energy storage (PHES), compressed air energy storage (CAES), and flywheel energy storage (FES). Each system uses a different method to store energy, such as PHES to store energy in the case of GES, to store energy in the case of gravity energy stock, to store ...
