

Does Ukraine need a long-term energy system?

More than ever, Ukraine needs support to transition towards a long-term energy system that is resilient, flexible and secure. The EU has the expertise, the ability and the will to help make that happen. Ukraine's energy systems have suffered significant damage since the full-scale invasion of 2022.

Does Ukraine need energy security?

In an era of growing geopolitical uncertainty, energy security is one thing that can still be actively safeguarded. More than ever, Ukraine needs support to transition towards a long-term energy system that is resilient, flexible and secure. The EU has the expertise, the ability and the will to help make that happen

What happened to Ukraine's thermal power stations in September 2024?

Ukraine's thermal power stations - primarily coal-fired - have borne the brunt of the attacks. Despite heroic efforts to maintain operations, as of September 2024, the country had lost 80% of its thermal capacity due to Russian attacks. Its large nuclear energy sector, which contributes 55% of total generation, has been less affected.

Does Ukraine have a reliable energy supply in wartime?

Ukraine's experience demonstrates the immense challenge of ensuring a reliable energy supply in wartime. The same goes for the grid. Ukraine's extensive transmission infrastructure has suffered severe damage in the war, with capacity falling from 56 GW to an estimated 9 GW by the end of 2024.

How has Ukraine's energy system changed since the invasion of 2022?

Ukraine's energy systems have suffered significant damage since the full-scale invasion of 2022. As of spring 2024, two thirds of the country's dispatchable power generation capacity has fallen under occupation, been damaged or destroyed. This has been accompanied by a coordinated destruction of the grid network.

Can Ukraine keep the lights on through the winter?

Yet, through incredible skill and resourcefulness, Ukraine has managed to keep the lights on through the winter. Now the unpredictable Trump administration has begun haphazardly withdrawing air defences and intelligence while using nuclear power stations as bargaining chips.

The SAEE is Ukraine's state body responsible for implementing state policy in the areas of energy efficiency, energy saving, renewable energy sources and alternative fuels. Morrow recently had its first gigafactory ...

DTEK announced its Ukrainian energy storage sites, which will be commissioned no later than September 2025, will provide grid ancillary services (namely automatic frequency restoration reserves) to national electricity transmission system operator Ukrenergo under the terms of a tender held on Aug. 22, 2024, of which DTEK was one of the winners. ...

The Ministry of Energy of the Republic of Moldova has launched a tender for 75 MW of battery energy storage, describing it as a significant step toward strengthening its energy security.

The Philippines" government will tender for 9,378MW of renewables, comprising distributed and large-scale solar PV, including ground-mount, rooftop and floating PV, alongside onshore wind capacity.

doing business in Ukraine. CMS energy and projects lawyers are recognised leaders in the sector in Ukraine and the firm holds a leading position in the energy sector receiving top rankings by Chambers Europe (2012-2021), Legal 500 (2015-2021), and Ukrainian Law Firms (2009-2020). CMS specialists provided their expertise on the legal ...
