

Could water power the future of energy?

Researchers from RMIT and the University of Melbourne found that electricity generated by water can be 10 times more powerful than previously thought, which could pave the way for breakthroughs in renewable fuel and energy storage.

Which battery energy storage projects have been successful in Western Australia?

2.6GWh of utility-scale battery energy storage projects have been successful in Western Australia's first Capacity Investment Scheme tender. Energy storage developer Energy Vault is set to fully acquire the 125MW/1GWh Stoney Creek battery energy storage system (BESS) in New South Wales, Australia, from Enervest Group.

Why is China promoting energy storage at the 2025 two sessions?

The buzzword "energy storage" at the 2025 Two Sessions underscores China's strategic focus on building a resilient, sustainable, and diverse energy system, contributing new efforts to a sustainable global future. The country's progress in new-type energy storage highlights how innovation can drive both economic and environmental progress worldwide.

Who owns a 150MW battery energy storage system?

Developer Peregrine Energy Solutions has secured US\$168 million for a 150MW battery energy storage system (BESS) currently under construction. This site is operated by a business or businesses owned by Informa PLC and all copyright resides with them. Informa PLC's registered office is 5 Howick Place, London SW1P 1WG.

What is pumped storage hydropower?

But another approach is pumped storage hydropower. Pumped hydro systems require two reservoirs of water—one higher in elevation than the other. When solar and wind energy are plentiful, that power can be used to pump water from the lower to the upper reservoir.

What's going on at the Energy Storage Summit Australia 2025?

NSW's BESS pipeline, PHES in Tasmania and the 'home of utility-scale storage' were discussed at the Energy Storage Summit Australia 2025. ESN Premium discusses the ongoing adaptation of EV battery lines to stationary storage applications with Jaehong Park, CEO of LG ES Vertech.

Example of closed-loop pumped storage hydropower ? World's biggest battery . Pumped storage hydropower is the world's largest battery technology, with a global installed capacity of nearly 200 GW - this accounts ...

As China achieves scaled development in the green energy sector, "new energy" remains a key topic at 2025 Two Sessions, China's most important annual event outlining ...

A huge amount of stationary energy storage will be needed to reduce net global greenhouse gas emissions to zero, said Cui, and water is the only realistic solvent available at the quantity and ...

US plans new water-powered battery tech to target grid-scale energy storage Backed by DOE, Stanford, SLAC, and 13 other institutions are working to overcome key battery limitations with water...

ESS Inc manufacturing its energy storage system at its Oregon plant. Image: ESS Inc. Iron-saltwater flow battery company ESS Inc looks set to deploy by far its largest project to-date, a 50MW/500MWh system at a ...

Water movement on surfaces makes more electric charge than expected Date: March 11, 2025 Source: RMIT University Summary: Researchers have discovered that water ...

Duration period of different water-based energy storage systems. 3. Thermal water tanks. Water tank storages have a long history as being one of the most commonly used ...

Factor This" News section is your premier destination for the latest updates and in-depth analysis across the renewable energy sector. Covering a wide array of topics--including solar power, wind energy, hydropower, energy ...

The environmental approvals were announced this week by Minister for the Environment and Water, Tanya Plibersek. She said: "We know renewable energy is cheaper, cleaner, and crucial to helping us cut emissions ...

ETN news is the leading magazine which covers latest energy storage news, renewable energy news, latest hydrogen news and much more. This magazine is published by CES in collaboration with IESA. Customized ...

The Energy Storage Report is now available to download. In it, you'll find the best of our content from Energy-Storage.news Premium and PV Tech Power, as well as new articles covering deployments, technology, policy ...

Energy-Storage.news has reported on larger projects as part of Premium-access exclusive pieces, based on local permitting and development filings in the US, including 4GWh ...

Despite being the largest form of renewable energy storage with nearly 200GW of installed capacity in over 400 operational projects, pumped storage still faces barriers to development. To help address this, a new ...

Energy storage developer and system integrator Energy Vault has closed on US\$28 million in project financing for the Calistoga Resiliency Centre (CRC) located in California, US. Premium "Noise can make or break a project": ...

The U.S. Department of Energy's Water Power Technologies Office enables research, development, and testing of emerging technologies to advance marine energy as ...

Andy MacPherson, Managing Director at Bluestone Energy, said: "Rapid deployment of flexible assets such as battery energy storage are essential in Scotland delivering net zero by 2045. The battery energy storage systems ...

Water tanks in buildings are simple examples of thermal energy storage systems. On a much grander scale, Finnish energy company Vantaa is building what it says will ...

As power grids rely more on renewable energy sources like wind and solar, balancing energy supply and demand becomes more challenging. A new analysis shows ...

Worldwide low-carbon energy strategies are driving an unprecedented boom in solar and wind power 1. Yet, the intermittent nature of these renewable energy sources presents substantial...

Energy storage system integrator HyperStrong has concluded an IPO to list its shares on the Shanghai Stock Exchange's STAR Market for science and technology innovation companies. Sembcorp launches Indonesia solar ...

This week Energy-Storage.news published a blog from Justin Wahid Rangooni, executive director of Energy Storage Canada, imploring policymakers and other stakeholders to act quickly to "unlock the potential" of ...

Quidnet Energy has adapted oil and gas drilling techniques to create "modular geomechanical storage." Energy is stored by pumping water from a surface pond under pressure ...

News Using liquid air for grid-scale energy storage A new model developed by an MIT-led team shows that liquid air energy storage could be the lowest-cost option for ensuring a continuous supply of power on a future grid ...

The U.S. Department of Energy's Water Power Technologies Office enables research, development, and testing of emerging technologies to advance marine energy as well as next-generation hydropower and pumped storage ...

A commonplace chemical used in water treatment facilities has been repurposed for large-scale energy storage in a new battery design by researchers at the Department of ...

With Australia's federal election set for 3 May 2025, Energy-Storage.news delves into how energy storage could be impacted. Ontario IESO: "Considerable amount" of battery storage will help meet Canadian province's ...

A new pumped hydro energy storage breakthrough leverages plain old water to shepherd more wind and solar power onto the grid (image via NREL). But First, A Word About Seams

A 238.5MW/477MWh standalone battery energy storage system (BESS) has been commissioned in South Australia, and an optimisation deal signed for another of the state's largest BESS assets. ... Energy ...

Three Houston startups are using fracking-like techniques to create underground storage caverns for pressurized water, which when released drives a turbine to send power to the grid.

The project in Goleta, California, as it looks under construction. Image: Gridstor. Updated 8 June 2023: Gridstor VP of policy and strategy Jason Burwen offered some more details on the project to Energy-Storage.news.The ...

One recent 16GWh BESS tender run by state-owned EPC firm China Power Construction Group saw bids averaging at US\$66.3/kWh while another competitive solicitation from oil and gas firm PetroChina received bids ...

The safety and eco-friendly nature of water-based electrolytes offer a major advantage over traditional electrolytes used in batteries. These offer better prospects for next-generation energy storage.
