

What are the energy storage products of the b2b platform

What are the benefits of B2B energy storage?

Businesses participating in B2B energy storage projects can enjoy reduced energy costs and enhanced reliability by shaving peak energy demand by as much as 25%. AMS, which landed one of the first and largest utility contracts for energy storage in the U.S., is building 50 MW of such projects for Southern California Edison.

Is AMS building a B2B energy storage system?

AMS is building 50 MW of B2B energy storage projects for Southern California Edison, a U.S. utility company. These projects, which will use Tesla energy storage systems, will be the first hybrid-electric building fleets used for grid support in the world.

What is flexible generation capacity & storage?

Flexible generation capacity and storage are elements of the energy transition and the continued expansion of intermittent renewable energy (RE) as they offer unparalleled flexibility to optimally deliver energy and ancillary services.

Should a storage portfolio have a software-as-a-service (SaaS) platform?

As storage portfolios grow, some asset owners will opt for bringing optimization capabilities (e.g., forecasting, simulation, trading, automated dispatch, market settlements) in-house, for which software-as-a-service (SaaS) platforms would become a better fit.

Where are the best markets for RE and battery storage optimization?

The most attractive markets for front-of-the-meter (FTM) RE and battery storage optimization and trading platforms are the United Kingdom, the United States, and Australia. However, as renewable penetration advances across markets, so will the need for flexible services and the business case for intelligent platforms.

GETenergy is a green fintech energy company operating a B2B renewable electricity distribution platform using proven Distributed Ledger Technology (DLT) to reduce electricity cost while helping the planet GO-GREEN. ... GET's ...
