

What is the building area of Xinya Dongfang?

Building area of 400,000 square meters. Xinya Dongfang is a professional EV Charger leading manufacturer that integrates the key circuit design, software development and platform application of charging station.

Is energy storage a key innovation field in China?

In November 2014, the State Council of China issued the Strategic Action Plan for energy development (2014-2020), confirming energy storage as one of the 9 key innovation fields and 20 key innovation directions.

What is the energy storage system?

The energy storage system includes 1&#215;5 MW&#215;2 h LiB, 1&#215;2 MW&#215;2 h VRFB. And the wind power of 99 MW had been put into operation in August 2012. The system is connected with the 35 kV bus. Through intelligent control, the system stores and releases power according to the coordinating with wind power.

Are China's Energy Storage Technology Standards perfect?

But the existing energy storage technology standards in China are not perfect, and a standardization system for the whole industry has not been established, let alone testing and approving products according to relevant standards.

Does China's energy storage industry have a comprehensive study?

However, because of the late start of China's energy storage industry, the comprehensive study for the whole industry is very few. We found a review which provided a relatively comprehensive analysis of the technical and economic issue of it. Compared with other studies, its research has a good comprehensiveness.

Who is Xinya Dongfang?

Xinya Dongfang is a professional EV Charger leading manufacturer that integrates the key circuit design, software development and platform application of charging station. As a technology-leading company, Xinya Dongfang has always been committed to the research development production, sales and operation of charging station for electric vehicles.
